DETAILED ACTION

Reason for Allowance

1. The following is an examiner's statement of reason for allowance: Claims 1-27 are allowed.

The present invention is directed to a multi layered protection scheme which is supported with sub-network connection (SNC) protection scheme. The line modules are activated and deactivated based on different upper and lower protection scheme.

Regarding claim 1, wherein the line modules are activated/deactivated based on different upper and lower protection schemes associated with the upper and lower protection layers, state maps associated with each of the line modules, the state maps storing state data that activates and deactivates the line modules, the state maps being updated in accordance with the lower protection scheme to perform intra-leg switching between the line modules in one of the working and protection legs, the state map being updated in accordance with the upper protection scheme to perform inter-leg switching between a first line module in one of the working and protection legs and a second line module in another of the working and protection legs and a network control module interconnected with the line modules and the network control module performing inter-leg switching by updating the state data in the state maps for corresponding line modules in associated working and protection legs.

Regarding claim 15, storing state data in state maps associated with each of the line modules, inter-leg switching between a first line module in one of the working and protection legs, a second line module in another of the working and protection legs by updating the state maps in accordance with an inter-leg protection scheme and activating and deactivating the line modules based on updates to the state maps.

The closest prior art DeBoer et al. (US 2004/0208118 A1) disclose a shared mesh protection scheme for defining an associated protection path when a working connection is established. The shared protection path is used for data traffic in the event a network failure is detected. It provides a controller for providing a 1: N shared mesh protection system to define a protection path associated with N working paths.

The dependent claims 2-14 and 27, and 16-26 are allowed since they depend on claims 1 and 15 respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 5,537,393 (Shioda et al.).
